- Find an article either in a newspaper, magazine, or at a reliable online source.
- Cut it out or print it up.
- Write 2-3 paragraphs summarizing the article, in your own words. Tell me what the author is trying to communicate.
- Write 1-2 paragraphs on how this article relates to you and your health. If it does not relate to you, explain to me how and why it does not.
- Attached article behind write up and turn in on assigned date.

Points will be taken off for not attaching the article to the write up, the article is not a current one (please make sure the date is on it), plagiarism (must be in your own words and not the author's), and not turning it in on time.
