Critical	>10	>1.39	>25	<30%
<b>5/13/22</b>	<b>6.75%*</b>	<b>1.15</b> (as of 5/3)	<b>21.0</b> (as of 5/9)	<b>50.4%</b> (as of 5/12)

[Per the Maryland State Department of Education](#), universal contact tracing is no longer needed in schools and childcare programs but can be continued as resources allow. Schools and childcare programs should follow [CDC isolation guidance](#) to exclude students or staff for COVID-19 cases. Schools and childcare programs should provide notification of the COVID-19 case at the classroom or grade level as appropriate. When an outbreak is identified, schools and childcare programs should identify close contacts of all persons with COVID-19 through contact tracing and exclude them [per CDC guidance](#). Additional measures may also be implemented in consultation with the health department.

\* CDC data reported from <https://covid.cdc.gov/covid-data-tracker>; local updates are delayed due a system outage at the Maryland Department of Health.

Data as of 5/13/2022

# COVID-19 Community Level and Vaccination

Per the [CDC COVID-19 Community Levels](#) and the [Maryland State Department of Education](#), people with COVID-19 symptoms, a positive test, or exposure to someone with COVID-19 should follow CDC guidance for isolation and quarantine and wear a mask regardless of the COVID-19 Community Level. According to the CDC, [vaccination](#) is considered the leading prevention strategy for those who are eligible.

## Prince George's Community Level

 **Low** (as of 5/12/22)

CDC Metrics	Prince George's Level
New COVID-19 Cases per 100,000 people in the past 7 days (cumulative)	<b>140.43</b> Low (<200.0)
New COVID-19 hospital admissions per 100,000 population (7-day total)	<b>4.1</b> Low (<10.0)
Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	<b>2.6%</b> Low (<10.0%)

# Infection Rate for Prince George's County

**Infection Rate for:**

Maryland: 1.23

D.C.: 0.91

As of May 4, our infection rate was at 1.15, or “high risk”. We have remained above 1.10 since the end of March.

**Estimated by CovidActNow.org**

Accessed 5/13/2022. Each data point is a 14-day weighted average. Presented as the most recent seven days of data as a dashed line, as data is often revised by states several days after reporting.

# Average Daily Case Rate (7-day Average by test date)

The average daily case rate at beginning of this week was 21.0 new cases per 100,000 residents. Our case rate has increased from a low of 2.3 cases per 100,000 residents on March 23<sup>rd</sup>.

Average New COVID-19 Cases Per Day Per 100,000 Residents

Data as of 5/13/22

# Healthcare System Available Capacity

There are a total of 952\* hospital beds within the county (including surge beds). Our current available capacity is around 50% while 48% of beds are in use for other issues and 2% are in use for patients with COVID-19.

## Available Hospital Capacity

\* Bed Count updated on 4/17/22 from 982 to 952 due to removal of unused temporary structures at Doctors Community Medical Center
