

Monica E. Goldson, Ed.D.
Interim Chief Executive Officer

October 15, 2018

Mr. Robert A. Gorrell
Executive Director
Public School Construction Program
200 West Baltimore Street, 2nd Floor
Baltimore, Maryland 21201

RE: Submission of the 2019 Comprehensive Maintenance Plan

Dear Mr. Gorrell:

In accordance with the requirements outlined within the Public School Construction Program's Administrative Procedures Guide, I am submitting Prince George's County Public Schools' FY 2019 Comprehensive Maintenance Plan which was approved by the Board of Education of Prince George's County on September 18, 2018.

The Comprehensive Maintenance Plan (CMP) details strategies to maximize efficiencies and correct deficiencies in each facility and minimize the need for replacement and major repairs. The CMP is an integral part of Building Services' Strategic Plan and staff is held accountable for the work carried out to improve the physical facilities of Prince George's County Public Schools. Your support and assistance is appreciated.

Please feel free to contact me, at 301-952-6008, should you have any questions.

Sincerely,

Monica E. Goldson, Ed.D.
Interim Chief Executive Officer

Board Action Summary

An Outline of the Chief Executive Officer's Recommendation to the Board of Education

New Program: Yes ☐ No ☒

Modified Program: Yes ☒ No ☐

Subject: FY 2019 Comprehensive Maintenance Plan

Abstract and Highlights:

The Board of Education accept the recommendation of the Chief Executive Officer and approve the FY 2019 Comprehensive Maintenance Plan (CMP) as required by the State of Maryland's Interagency Committee on School Construction and the Public School Construction Program.

Prince George's County Public Schools' required maintenance activities are reasonable to keep school facilities open and safe for use. The CMP details strategies to maximize efficiencies in each facility and minimize the need for replacement or major repairs.

Budget Implications: None as presented in the Comprehensive Maintenance Plan; however, estimated costs are presented for planning purposes.

Staffing Implications: None

School(s) Affected: All Prince George's County Facilities

Preparation Date: July 11, 2018

Person Preparing: Sam Stefanelli

Board Agenda Introduction Date (First Reader): September 6, 2018

Board Action Date (Second Reader): September 18, 2018

Executive Summary

This Comprehensive Maintenance Plan (CMP) for Prince George's County Public Schools (PGCPS) provides a strategic overview of Building Services. Building Services is comprised of two departments: The Department of Maintenance and the Department of Plant Operations. The CMP provides an overview of procedures, schedules and projects by schools focused on providing the best learning environment through safe and healthy conditions for all of our students. Our staff of dedicated maintenance professionals take great pride in providing a learning environment where children can achieve success in all of their instructional programming.

The Department of Maintenance staff continues to work collaboratively with Capital Programs providing such services/inputs as: (1) selecting of projects to be included in capital budget; (2) managing selected capital projects, (3) providing specifications for design of capital projects; (4) providing post completion audits of capital projects.

We have successfully implemented the Maintenance Module of School Dude, and as of July 1, 2017, have fully implemented the Facility Use module for all facilities as the official scheduling calendar. Community Scheduling Calendar and online payments were implemented May 1, 2018. Additionally, we are piloting Capital Forecasting, and implementing Preventive Maintenance modules.

We will continue to provide ongoing communication of our mission, core services, and objectives through a series of meetings with all staff planned for the 2018-2019 school year.

Mission Statement

To provide a clean, healthy, and safe working environment for students, staff and the community.

The objectives of the mission statement are aligned with the Educational Facilities Master Plan and the Capital Improvement Plan as follows:

- Maintain positive learning environments conducive to high student achievement.
- Provide uninterrupted use of all facilities supportive of highly effective teaching.
- Comply with all pertinent Federal, State, and local governmental regulations resulting in a safe and supportive school environment.
- Create comfortable and attractive teaching environments that reassure and strengthen community partnerships.
- Effectively and efficiently protect the asset value of all facilities, equipment and grounds while conserving energy, water and resources.

Our efforts are directed towards ensuring that all school environments are conducive to teaching and learning and ensuring our schools are attractive and encourage use by the general community.

Services Overview

Building Services is comprised of two departments Maintenance and Plant Operations. Our mission is to provide a safe, clean, and healthy environment for all schools, administrative facilities, students, and staff. Additionally, Building Services is responsible for environmental and air quality, real property management, and pest control. Building Services is supported by central office staff to meet the mission of the departments.

Building Services Office Staff

The Building Services' office staff is organized to provide guidance and support for the department. Central office staff includes the following positions:

1. Director
2. Facilities Supervisor - Plant Operations
3. Facilities Supervisor – Maintenance
4. Facility Management System Coordinator
5. Environmental Program Specialist
6. Management Analyst
7. Facility Coordinators
8. Shop Coordinator
9. Training Coordinator
10. Shop Planners
11. Building Supervisors
12. Custodial Services/Auxiliary Crew
13. Budget/Financial Analyst
14. Data Planning Analyst
15. Emergency Repairs Dispatcher
16. Support Staff

Maintenance

Maintenance provides healthy and functional working environments to all schools and offices. Specific functions within the Department of Maintenance include the managing and tracking of the following:

1. Work Order Control
2. Emergency Repairs
3. Routine Maintenance and Repair
4. Preventive Maintenance
5. Training
6. Assessment and Inspections
7. Refurbishment and Replacement of Building Systems Support
8. Relocating of Temporary Buildings
9. Building Automation Management
10. Disaster Response
11. Grounds Maintenance

Plant Operations

Plant Operations provides custodial services and building services to school and office facilities. This is accomplished with dotted line reporting responsibility of the school based Building Supervisors and shared management of school based custodians with school principals. Specific functions within the Department of Plant Operations include the managing and tracking of the:

1. Building and Equipment Management
2. Custodial Services
3. Emergency Repairs
4. Training
5. Maintaining Grounds, including Snow Removal
6. Facility Use Management
7. Facility Inspections
8. Preventive Maintenance
9. Staff Management
10. Disaster Response & Clean-up

Environmental Safety

Environmental Safety provides a healthy learning environment for students at all schools as well as a safe working environment for staff. This is accomplished by ensuring that the air and water are safe; and there is no exposed asbestos. Specific functions for Environmental Safety include:

1. Facility Inspections
2. Remove Exposed Asbestos
3. Coordinate Projects with Capital Programs
4. Test and Maintain Water Quality
5. Test and Maintain Air Quality
6. Test and Remediate Lead Based Paint
7. Training

Pest Control

Pest Control provides a pest-free environment to school and office facilities. This is accomplished with environmentally safe and code approved products. Specific functions for Pest Control include:

1. Facility Inspections
2. Treatment of Facilities
3. Removal of Pests and Small Animals
4. Training

Real Property Management

The single point of contact for real estate matters for the Prince George's County Board of Education is the Director of Building Services who coordinates with the offices of the General Counsel and Capital Programs, and prepares documents for action by the Board of Education including:

1. Lease of School Property
2. Acquisition of School Property
3. Space Allocation
4. Management of Vacant Properties

Training

The Building Services Training Specialist is responsible for the coordination, development, oversight, and management of all professional development classes, seminars, workshops and presentations for the departments. The three training goals are: Preventing Accidents; Increasing Employee Knowledge; and Improving Performance.

Training objectives include: how to prevent accidents or near misses; job responsibilities for employees who have a new assignment or who are a new hire; a review of policies and procedures; and review of new tools and equipment. Training objectives will also be determined based on the needs of the staff through assessments.

As we invest in new technology in the form of building systems and equipment, we are committed to increasing the knowledge base of our custodial and maintenance employees to protect the State and county's investment in Prince George's County Public Schools. Comprehensive training for staff in partnership with Prince George's County Community College will include the attainment of certification in Facility Management which will have a direct impact on reducing costs, improving productivity and pursuing sustainability.

Functions

The Building Services' staff provides support in 11 functional areas identified below for over 237 facilities housing students and central office staff.

- Building Services' Office Support to all Divisions and Offices
- Building and Equipment Management
- Routine Maintenance and Repair of Buildings and Building Systems
- Assessments and Inspections
- Refurbishment and Replacement of Building Systems
- Building Automation Management
- Facility Use Management
- Pest Control
- Environmental Safety
- Real Property Management
- Training

Building Services' Office Support to all Divisions and Offices

Services to the divisions and offices of Information Technology, Business Management Services, Student Services, Performance Management, Curriculum and Instruction, Human Resources, and Area offices are coordinated through two central locations including the Facilities Administration Building and the Facility Services Base. The Facilities Administration Building houses office staff and the Facility Services Base houses the Master Foremen, shop crews and clerical staff. These two offices are in close proximity and interact throughout the day.

The Department of Plant Operations manages the after school use of our facilities. Board of Education Policy 1330 and Administrative Procedure 1330 details in accordance with MD Ann. Code, Educ, Art. § 7-108-110 the guidelines that govern the use of our facilities by community groups. Community groups are charged a fee to cover the operation, maintenance, custodial and food service costs associated with the use of the building. The process is currently managed by one staff member. This process has been automated for all internal users through our Facility Use module of School Dude and the external groups in May 2018.

Building and Equipment Management

Building Services' utilizes custodial staff and building supervisors to provide a clean, safe, and functional building inside and out, for the wellbeing of all students, staff, and community members. Each facility is assigned custodial staff and a Building Supervisor to maintain the building in accordance with all policies and procedures.

Building Services also performs a wide variety of routine maintenance and repair services at all PGCPs facilities. Routine maintenance and repairs to building components and systems are made in the areas of heating, ventilation, air conditioning, electrical, carpentry, roofing, grounds, masonry, painting, glass, and plumbing. The Maintenance Department plays a critical role in general maintenance areas of landscaping, grass cutting, snow removal, temporary building relocations, locksmith/security, trash removal, and general hauling and excavation.

Preventive Maintenance is a function that ensures quality control of mechanical systems currently being updated to align with new policies and procedures. In addition, Facility Coordinators assess facility needs in order to compile data, and coordinate the execution of preventive maintenance at each facility. We are currently updating Building Services software management system with a program that will allow for preventive maintenance quality control and will roll this out during the 2018-2019 school year.

The Maintenance Direct module of School Dude is fully operational. Standard Operating Procedures have been developed and disseminated to reinforce proper practice and establish guidelines as to how the work order system will be used. The information provided must be followed and staff is held accountable. Standard Operating Procedures have included topics such as: Work Order Status-Work in Progress, Action Taken, Priority Emergency, Duplicate Work Orders, Work Orders Requiring Multiple Shops, Daily Technician Procedures, Parts On Order, Work Order Reassignment, and Open Extended Work Orders.

Assessments and Inspections

Formal roofing inspections are performed every six months per State directive. Formal playground, bleacher, sprinkler, fire hydrant, and other "specialty" inspections are completed periodically. Also, an annual comprehensive building site evaluation is completed using the State of Maryland's Public School Construction Program's format. The Preventive Maintenance module in School Dude will allow us to create scheduled work orders to provide consistency. Building Services uses this collective set of inspections to identify and prioritize future projects.

Refurbishment and Replacement

Formal routine facility assessments are conducted annually by Building Services with ongoing data compiled to determine a life-cycle plan to refurbish or replace facility equipment and building components. Building Services maintains the refurbishment and replacement schedule of all equipment to compile future projects and requests in the Capital Improvement Program.

Building Automation Management

Building Services has made significant progress in providing to many of our schools an automated Energy Management System. This allows a higher level of maintaining a conducive learning environment for all students. These schools are incorporated into METAXY'S System and are managed by computerized controls for cooling and heating systems. It is also monitored by staff trained in energy management to maintain the proper calibrations at all times. This allows for a quick response time for repairs and adjustments, with little down time.

Environmental Safety

Asbestos Inspection surveys are conducted at each facility every three years and periodic surveillances are conducted every six months, at each facility. Findings are analyzed and asbestos abatement is completed as needed. The scheduling of abatement projects are prioritized each year and coordinated with Building Services and Capital Program projects.

Air Quality is tested and analyzed on an as needed basis. Action is collaborated with Building Services' Coordinators, Master Foremen, and Capital Programs to remediate air quality issues that do not meet standards.

Well water facilities are tested at all Prince George's County Public Schools quarterly with wells at (Baden Elementary School and the William Schmidt Center) to ensure water quality and is treated, as needed.

The school system has developed and implemented a Lead in Water Testing and Remediation plan, which started in April 2017. Initially all schools and office buildings were tested and the immediate response was for all fixtures that tested above the PGPCS action levels of 10 parts per billion were taken out of service, and bottled water was provided where needed. PGPCS will continue with the remediation plan until all facilities are at or below PGPCS action levels.

Filtered drinking fountains are being placed in all multi-purpose rooms in all schools (2 in all middle and high schools and 1 in all elementary schools). Additionally, outside all gymnasiums in all elementary, middle and high schools, a double ADA compliant bottle fill station will be installed.

Pest Control provides a healthy environment for all students and staff by inspecting kitchens and teacher lounges every 30 days at each school site and providing treatment, as needed. In addition, emergency inspections and treatments are conducted on an as needed basis at all facilities.

Training is conducted with building custodians each year to ensure awareness in all environmental safety areas.

Maintenance and Plant Operation Disaster Response

The Department of Building Services responds to disasters, including, but not limited to, tornadoes, fires, earthquakes, hurricanes, and flooding. With a collaborative effort, staff has demonstrated the ability to conduct a fast coordinated and sustained response to assess facilities for safety concerns, establish an action log of needs, and execute all work in a timely manner to ensure students and staff have a safe, clean, and functional facility.

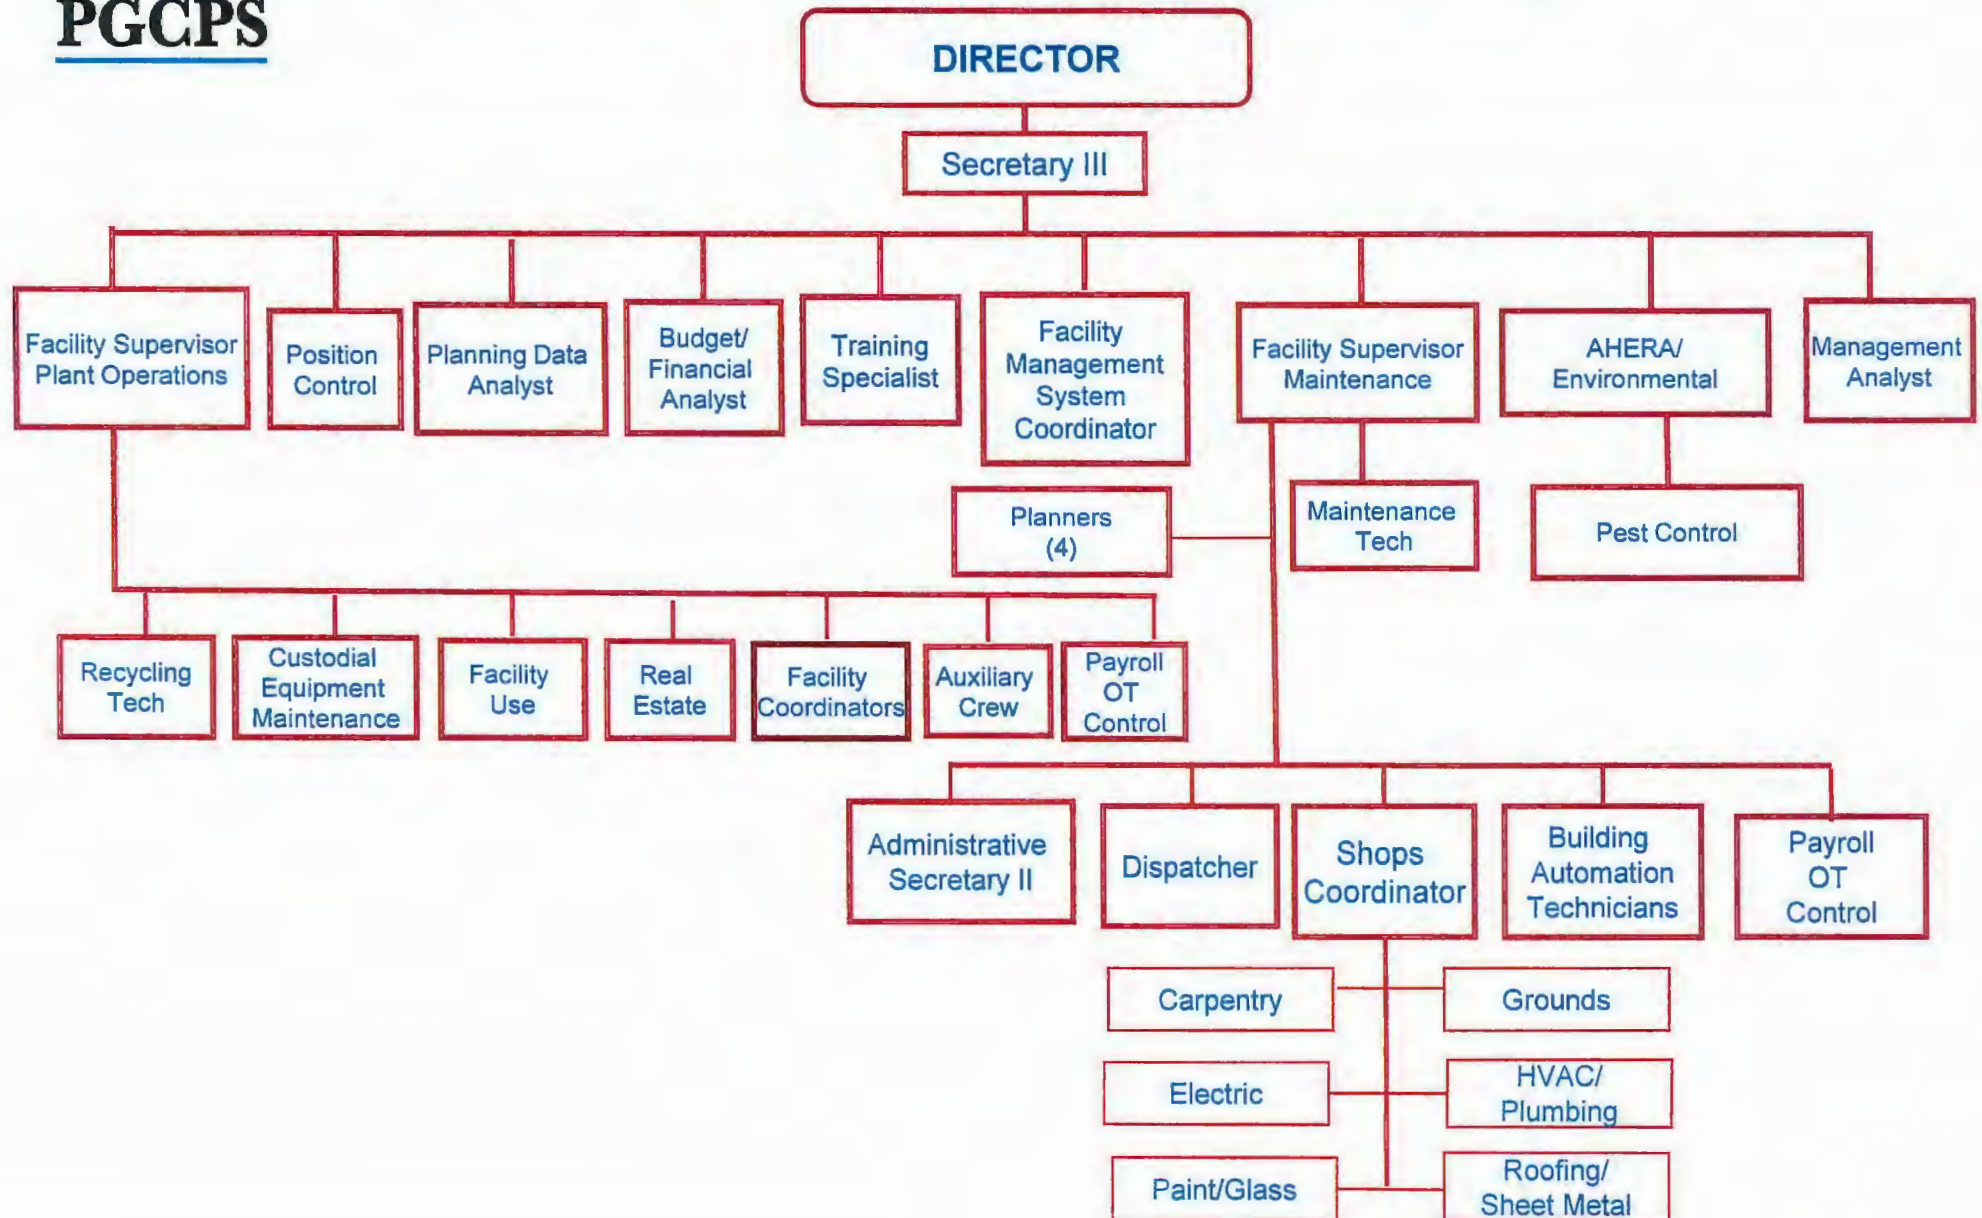

Training

Building Services is committed to providing a robust training program for our employees. Training topics will be developed, in part, based on the results of a pretest given to employees to identify training needs. A goal of the training program will be to decrease accidents and to increase employee's knowledge base and performance as measured by increased work productivity.

An Apprentice Program is being developed to provide a four to five year training program for employees assigned to a specific shop. Training courses will be designed to best prepare the employee for the assigned trade. Apprentices will work on assigned projects for generally forty hours per week. As the apprentice successfully completes each year of training, they will graduate to the next level and are compensated with an increase in pay. Funding for the Apprentice Program comes from vacant positions that the Apprentice will eventually fill when the program is completed.

Preventive Maintenance

Our Preventive Maintenance (PM) initiative is a hybrid program based on the collaborative work efforts of the Maintenance Shop Crews, Building Supervisors and Engineers and outside service contractors.

Our Preventive Maintenance (PM) strategy is based on the technical definition of the term as follows:

1. The care and servicing of facilities and operational systems for the purpose of maintaining equipment and facilities in satisfactory operating condition by providing for systematic inspection, detection, and correction of incipient failures either before they occur or before they develop into major defects. Preventive Maintenance includes assessments, tests, measurements, adjustments, and parts replacement, performed specifically to prevent faults from occurring. Preventive Maintenance requires strategic actions for prolonging the life of building components.
2. During the 2017-2018 school year we began implementing our Preventive Management module in our computerized facility management system, School Dude. During the 2018-2019 school year, we will fully implement this module.
3. Our PM strategy is a hybrid program based on the collaborative efforts of the Maintenance Shop crews, Building Supervisors, Building Equipment Operators, and Custodial Contractors. It is important to note that the main job responsibility of the Building Equipment Operator is to perform preventive maintenance on facility equipment.

Our Work Order System, School Dude, will give us the ability to assign and track preventive maintenance work orders/tasks given to Building Equipment Operators. The activities listed below are scheduled to occur between May 1st and September 30th, each year, by outside contractors based on established contract requirements as part of our Preventive Maintenance strategy.

Low Pressure Centrifugal Chillers

Cooling Season Start-up Preparation and Inspection

- Checking refrigerant and oil levels
- Checking oil sump and purge oil heaters and temperatures
- Checking and testing all operating and safety controls
- Checking the starter operation
- Starting the chiller and calibrating controls
- Checking purge unit operation
- Logging operating conditions after system and unit stabilize
- Reviewing operating procedures and owner's log with operator
- Checking auxiliary equipment operation

Operating Season Inspections

- Inspecting chiller and adjusting safety controls
- Checking purge operation
- Checking operation of controls
- Checking oil and refrigerant levels
- Checking operation of lube system
- Checking the oil return system
- Checking operation of motor and starter
- Recording operating conditions
- Checking log and reviewing chiller and system operation with operator
- Check condenser and cooler water flows
- Checking the refrigerant cycle to verify the proper operating balance
- Checking condenser water and chilled water heat transfer
- Logging and reporting repairs and parts that are required

Annual Equipment Shutdown Inspection and Preventive Maintenance

- Recording voltages
- Measuring and recording motor winding resistance
- Lubricating open motor
- Checking the alignment on open drive units
- Checking the coupling
- Checking seals
- Checking inlet vane operator and linkage; lubricating where required

Checking the Compressor Oil System

- Changing oil, oil filter and dryer
- Conducting analysis on oil and oil filter at an independent laboratory
- Checking oil pump, seal and motor
- Cleaning the dirt leg
- Checking heater and thermostat
- Checking all other oil system components including cooler, strainer and solenoid valve where applicable

Checking Motor Starter

- Running diagnostic check
- Cleaning and inspecting heat exchanger
- Checking starter coolant pump and motor
- Megging motor
- Checking all terminals and tightening connections
- Cleaning or replacing air filter or starter fluid
- Checking overloads and calibrating
- Checking status lights

Review the Control Panel

- Running diagnostic check of Micro Control Panel
- Checking safety shutdown operation
- Checking all terminals and tightening connections
- Checking Display Data accuracy and set points

Reviewing the Purge Unit

- Inspecting the operation of the unit
- Changing filter drier
- Checking all other components for proper condition and operation; recording pressure control set point

Checking the Condenser

- Checking flow switch operation
- Removing condenser head and inspecting end sheets
- Mechanically brush cleaning condenser water tubes

Checking the Cooler

- Checking flow switch operation
- Checking refrigerant level

Checking the System

- Conducting a leak check and identifying leak sources for repairs
- Adding refrigerant as required (refrigerant provided by owner)
- Recording condition of sight glasses
- Checking the refrigerant cycle to verify the proper operating balance
- Checking condenser water and chilled water heat transfer

General items

- Repairing insulation removed for inspection and maintenance procedures
- Cleaning equipment and surrounding area upon completion of work
- Consulting with the operator
- Reporting deficiencies and repairs required

Cooling Tower Unit

Annual Maintenance Inspection

- Check volt/amps of fan motor(s)
- Check/tighten all electrical connections
- Check all starters/contactors for wear
- Check all operating/safety controls
- Check belts/replace per contract
- Check sheaves wear / alignment
- Check/clean fan sheaves and blade assembly
- Check/lubricate motor bearings
- Check/lubricate blower/fan bearings
- Check/lubricate couplings
- Check/lubricate gear boxes
- Check/clean strainers and screens
- Check/clean distribution pans/spray nozzles
- Check/clean sump
- Check/adjust float valve
- Check/adjust bleed-off rate
- Check/lube damper assembly if applicable
- Check economizer/controls if applicable
- Check/fill and baffles if applicable
- Check sump heaters operation if applicable
- Check overall condition of unit

Operational Inspection

- Check volt/amps of fan motor(s)
- Check/adjust belt tension
- Check sheaves wear/alignment
- Check/flush sump
- Check/adjust float valve
- Check/adjust bleed-off rate
- Check/clean strainers and screens
- Check/clean debris from unit
- Check/distribution pans/spray nozzles
- Check blower/fan bearings
- Check motor bearings
- Check overall condition of unit

Shutdown Inspection

- Check volt/amps of fan motor
- Check/flush and drain sump
- Check/drain make-up water piping
- Check/drain piping
- Check/clean strainers and screens
- Check/clean debris from unit
- Check distribution pans/spray nozzles
- Check blower/fan bearings
- Check overall condition of unit

Screw Air-Cooled Chillers

Cooling season start-up preparation and inspection

- Checking auxiliary equipment operation
- Checking refrigerant levels
- Perform oil analysis
- Checking the compressor heater, oil temperature and lube system
- Checking and testing all operating and safety controls
- Checking for proper voltage and starter operation
- Starting the chilled and condenser water pumps where applicable
- Starting the unit and calibrating controls and transducers
- Checking the proper settings for sub cooling and super heat
- Logging operating conditions after the unit stabilizes
- Reviewing operating procedures with the operator
- Removing debris from inside and around the unit
- Inspecting condenser coils for blockage and clean lines
- Inspecting and tightening electrical connections
- Checking the fan and fan motor operation after start-up

Operating Season Inspections

- Logging operating conditions and identifying inconsistencies
- Adjusting operating controls if required
- Checking for proper oil level and refrigerant charge
- Checking the oil temperature and compressor heater
- Inspecting starter, relays and controls
- Inspecting the air-cooled condenser fans, and motor operation
- Removing debris from inside and around the unit
- Removing operating procedures and the owner's log with the operator

Annual equipment shutdown inspection and Preventive Maintenance

- Measuring and recording motor winding resistance
- Changing the oil filter
- Checking the oil level in the lube system; adding oil as required; and conducting an oil acidity test
- Conducting a leak check and correcting leaks; also adding refrigerant as required
- Changing the filter-dryer
- Checking the crankcase heater for proper operation
- Tightening the power wiring on contactors and in the motor terminal box
- Cleaning all contactors and recommending replacement if required
- Checking all relays, operating controls and safeties
- Checking and calibrating all controls, safeties, unloaders, and external interlocks

Electrical Backup Generators

Under an existing contract; generators are inspected annually by outside contractors. The service includes testing, lubrication, oil and filter change, battery check and overall system check including the transfer switch.

Boiler Room Procedures

Daily

- Check and service the boilers, oil burners, and gas burners each morning. Enter all data in the boiler logbook.
- Check the boiler water level daily by opening the Try Cocks and the sight-glass drain valve. Do not operate a boiler with too little or too much water. It must be between the top and bottom Try Cocks.
- Stick the oil tank on Monday, Wednesday, and Friday to determine the amount of oil on hand. Record on log sheet.

Weekly

- The bottom blow down valve is to be opened for a five second blow down once a week. Build up pressure on the boiler then shut it off for ten minutes before the bottom blow down is opened.
- Check the burner, fan belts, and the oil level in the burner gearbox each week on the rotary cup oil burners. The oil level is maintained one-quarter inch from the cup rim.
- Test the low draft cut-off weekly by opening the line to the fan chamber. With the line open, the burner should shut down in about eight seconds.
- Once a week the scanner is to be tested by its removal while the burner is operating. Wait for the timer in the control to come to a stop to be sure the igniter is off. The control must be reset two minutes after the burner has come to a stop.

Weekly

- First turn off the compressor.
- Clean the air filter.
- Check the oil level three times a week - Monday, Wednesday and Friday
- Drain the water from the tank and airline filters.
- Check the compressor belt.
- Keep the compressor clean by wiping the unit with a dampened cloth, after the compressor has cooled.
- Clean dust and dirt off condenser coils on the air dryer once a month.
- Change the oil in the compressors as recommended by the manufacturer.
- Use only oil recommended by the manufacturer.
- Check the compressor air safety valve once a week or as recommended by the manufacturer.

Twice Weekly

- Test the low water cut-off twice each week by lowering the level in its equalizing line with the burner operating. Alternate between the water column and the low water cut-off drain for the best flushing of the lines. Report immediately if the burner will not shut down.
- Clean the oil strainers twice a week.

Monthly

Open the surface blow down valves on the boilers every thirty days. Use the quick opening valve first and the slow opening valve next. Open with a pressure on the steam gauge and close in about ten seconds. Close the slow opening valve first.

The safety valves on the steam boilers must be opened fully once each week with pressure on the steam gauge and released to allow the valve to close quickly.

Atomizing Oil Burners

The oil nozzle and diffuser on atomizing burners using number two fuel oil should be cleaned monthly.

The oil nozzles and diffuser on atomizing burners should be removed and cleaned every Monday, Wednesday and Friday, and the first day after a holiday.

Check the burner opening for carbon buildup and clean.

Report problems of the oil burners to the Department of Maintenance.

Atomizing Oil Burner Air Compressor

Clean the air filters on the compressors once a week.

Check the oil level daily.

Report problems of oil leaks and other malfunctions of the compressor to the Department of Maintenance.

Change the oil in the compressors as recommended by the manufacturer.

Drain the traps on the compressor each day to prevent oil from getting into the air line connected to the oil burner.

Check the compressor air safety valve once a week.

Check the compressor air lines weekly for leaks or cracks.

Permanent Air Filters - Cleaning Procedures

Brush or vacuum heavy dust from metal air filters.

Wash filters with water; allow drying.

Spray filters with filter oil.

Clean filters every thirty days.

Maintain log sheet of filters cleaned.

Replaceable Throwaway Filters

Replace with new air filters when filters are dirty or every thirty days, whichever occurs first. Filters are already treated with filter oil.

Keep log sheet of filters changed.

Bag and Pre-Filter Systems

Pre-filters on systems having bag filters are to be changed every thirty days
Bag filters on systems with pre-filters are to be changed yearly, more often, as needed.

Bag filter systems are to be changed every six months or as needed.

Kitchen Hood Filters

Clean the kitchen hood filters once a week. Do not spray with oil.
Kitchen Hoods fire suppression systems and are tested every six months
Keep log sheet of all filters cleaned.

Emergency Generator

Cut off the generator before checking.
Check fluid level in the radiator.
Check tension of fan belts.
Check engine oil level.
Check battery water level.
Check exhaust system every thirty days.
Clean the battery cables every ninety days.
Change the oil and oil filter. Use only the oil recommended for the generator.
Change the fuel filter.
Change the air intake filter.
Some units will have an automatic operating switch to turn the units on.
However, you must check the units yourself to make sure they will run.
All emergency generators must be tested each day that the building is scheduled for use by an activity in the evening.

Emergency Battery Power Pack Lighting Units

Check the operation of units twice a week on Tuesday and Thursday.
Check the battery water level once a week. Lean the battery cables once every thirty days.
Report all problems of units to Department of Maintenance.

Gas Fueled Water Heaters

Daily

Check for the smell of gas leaks. If gas leaks are detected, shut off the main gas valve to that unit.
Check water temperatures.
Look for water leaks around the pressure relief valve. Check the relief valve every six months for proper operation.
Report problems of operation to Maintenance Department immediately.
Keep log sheet of operation of hot water heaters.

Oil Fueled Heaters

Daily

Check for oil leaks. If leaks are detected, shut down heater by the main electrical switch and close oil line valve.
Check water temperatures.
Look for water leaks around the pressure relief valve. Check the relief valve every six months for proper operation.
Report problems of operation to Maintenance Department immediately.
Keep log sheet of operation of hot water heaters.

Electric Heaters

Daily

Check for electrical problems. If electrical problems are detected, shut off the main electrical switch to the heater.
Check the water temperature.
Look for water leaks around the pressure relief valve.
Check the relief valve every six months for proper operations.
Report problems of operation to the Department of Maintenance, immediately.
Keep log sheet of operation of hot water heaters.

Hot Water Storage Tanks

Daily

Check temperatures and pressures on the gauges.
Report any steam or water leaks to Maintenance Department.

Check the pressure relief valves for water leaks. Check the relief valve every six months for proper operation.
Keep log sheet of operation of hot water storage tanks.
Some hot water storage tanks are heated by a boiler and/or hot water heat. During the winter months or whenever the boiler is on, the hot water heater should be shut down.

Procedures for Cleaning and Hosing Down the Boiler Room

Cut off all electrical equipment.
Brush down the boilers, pipes, equipment and electrical panel. Do not use water.
Sweep the boiler room floor.
Before hosing the boiler room floor, cover the electrical equipment near the floor with a protective covering to prevent water from getting into the equipment.
By following these instructions, you will be protecting yourself and others from danger.

Procedures for Checking the Fire Alarm Systems

Building supervisors and building equipment operators must check the fire alarm system early each morning prior to the arrival of students, using a different station each day.
Maintain log sheet of dates checked and the number/location of the station checked each day.
If it becomes necessary to test the alarm after 4:00 p.m. or before 8:00 a.m. Monday through Friday or at any time on weekends or holidays, the Security Office must be notified prior to the test.
Any malfunctions of the fire alarm system should be reported to the Department of Maintenance, immediately.

Procedures for Checking the Air Handling Units and Unit Ventilators

Check and clean the air filters every thirty days, more often if needed. Be sure to vacuum inside the unit. Check the fan belts.
The motors will require oiling and greasing as prescribed by the manufacturer. Contact the Department of Maintenance.
The shaft bearing will require oiling or greasing as prescribed by the manufacturer. Contact the Department of Maintenance.
Keep log sheet of filters cleaned and motors oiled.
Use the right grade of motor oil recommended by the manufacturer for all equipment.
Report any malfunctions of equipment to the Department of Maintenance.

Summer Maintenance for Mechanical Equipment

Boiler Lay-up Procedures

Before the final shut-down check for leaks or other defects in the boiler and report.

Blow down the water column and the low water cut-off.

Check the safety valve.

After the final shut-down all boilers not utilized for heating water for the kitchen or showers shall be thoroughly cleaned for summer lay-up by the third week in May. All others shall be cleaned no later than the end of the third week in June.

Clean the tubes and the tube sheet before the boiler cools down.

As soon as the boiler cools down, clean the combustion chamber and the rear tube sheet. Remove soot from the top of the firebox wall and from the firebox. Be careful in the removal of carbon from the brickwork. The carbon may be fused to the brick and you may cause damage to the firebox.

Remove soot from the breeching and the chimney clean-out door. Leave the clean-out door or any other door in the breeching open to reduce the draft being drawn through the boiler. Brush or remove soot from all piping, boilers and auxiliary equipment.

Remove all soot from the boiler room and thoroughly clean the burner inside and out. Clean soot and dirt off other equipment in the boiler room.

Clean the oil nozzles on air atomizing burners.

Clean the oil filters.

Empty sand pans and refill with clean sand.

Sweep and hose the boiler room floor. Clean all oil from the boiler room floor.

Remove unnecessary items and clean the boiler room thoroughly. Do not soak the boiler or electrical equipment.

Leave all doors on the boilers and breeching open.

Unit Ventilators and Convectors

Monthly

Remove unit cover and clean around fans thoroughly.

Wipe up spilled oil.

Brush the underside of the heating coil.

Wash the filter with water pressure. Allow to dry.

Oil the motor and fan bearings and check the belt.

Check the convectors for dust or cobweb accumulation and clean.

Roof Fans

Monthly

Replace with new air filters when filters are dirty or every thirty days, whichever occurs first.

Turn on the fans. The fan will have a switch to turn it off in its housing to control the operation while servicing.

Check the belt and grease the motor and fan bearings, where it is required.

Report frayed belts or other malfunctions.

After checking the fans, turn off all fans that are not needed during the summer shutdown.

Facilities Needs/Plan

Attachment C provides a list of schools identified as in need of major projects and does not include the 12 office buildings. The list includes a description of the project, the estimated cost, the funding source and the year the project is funded. Projects identified under the category of CIP are coded as Cnty A (County Approved), ASP (Aging Schools Program), S/PF (Systemics/Pending Funding), Request (will be requested for inclusion in the CIP), BPW/PF (Board of Public Works/Pending Funding, ACI (Air Conditioning Initiative) and Request/Grant (there is a grant match). This list does not include projects identified as Secondary School Reform and Special Education Initiative.

These projects are based on the PARSONS study, the Master Plan Support Project, our work order system; mandated environmental compliance requirements, and from the insight of our maintenance staff on the life cycle of our buildings and equipment.

Schools	Projects Requested	Estimated Cost	CIP/Building Services	Fiscal Year Funded
ACCOKEEK ACADEMY (UPPER/LOWER)	N/A			
ADELPHI ELEMENTARY	Playground Equipment	\$ 30,000	Cnty Approved	2015
	Serving lines, exhaust, refrigerator, freezer	\$ 400,000	Cnty Approved	2015
	Generator replacement	\$ 95,000	ASP-State Requested	2020
	Replace 2 boilers	\$ 650,000	Cnty Requested	2020
ALLENWOOD ELEMENTARY	Central air conditioning system	\$ 974,000	ACI-Approved, State and Cnty	2014
	Steam kettle and electric breaker panel replacement	\$ 33,000	Cnty Approved	2014
	Upgrade grease trap-code violation	\$ 36,735	Cnty Approved	2016
	Window wall-courtyard	\$ 575,000	State and Cnty Approved	2017
	Asbestos ceiling tile abatement	\$ 100,000	Cnty Approved	2018
	Basketball Court	\$ 22,500	Cnty Approved-Rosecroft	2018
	Interior painting	\$ 47,177	General Operating Funds	2018
	Generator replacement	\$ 95,000	ASP-State Requested	2020
ANDREW JACKSON MIDDLE	Grease Trap-Code	\$ 45,000	Cnty Approved	2014
	Exterior Window replacement	\$ 639,000	State & Cnty Approved	2018
	HVAC Equipment Upgrade including Replacement of Hot and Chilled Water Piping, Cooling Tower, Steam System and 14 AHUs, Mechanical Room and Penthouse Abatement, DDC Controls upgrade	\$ 17,641,000	State & Cnty Requested	2020
	Parking lot resurfacing	\$ 384,000	Cnty Approved	2019
ANNAPOLIS ROAD ACADEMY	Univent replacement	\$ 700,000	State & Cnty Approved	2014
	Piping replacement	\$ 890,000	State & Cnty Approved	2016
	Grease Trap-Code	\$ 36,735	Cnty Approved	2016
	Roof top units replacement	\$ 255,000	State & Cnty Approved	2016
	Elevator/conveyance systems	\$ 384,000	State & Cnty Approved	2017
	MPR flooring	\$ 20,000	General Operating Funds	2018
	Window replacement	\$ 255,000	State & Cnty Approved	2018
	Fire alarm replacement	\$ 320,000	Cnty Requested	2020
APPLE GROVE ELEMENTARY	Unit Ventilator Replacement (EEI)	\$ 903,000	State and Cnty Approved	2014
	Generator replacement various schools	\$ 82,000	State and Cnty Approved	2015
	Upgrade grease trap-code violation	\$ 45,000	Cnty Approved	2015
	Playground Equipment-PreK	\$ 30,000	Cnty Approved	2015
	5-3 Ton packaged gas A/C, for 5 Rm's/replacement	\$ 80,000	General Operating Funds	2016
	Fencing replacement	\$ 22,500	Cnty Approved	2018
	Asbestos ceiling tile abatement	\$ 187,000	Cnty Approved-Rosecroft	2018
	Asbestos ceiling tile abatement	\$ 52,155	General Operating Funds	2018
	Basketball Court	\$ 22,500	Cnty Approved-Rosecroft	2018
	Interior painting	\$ 24,000	General Operating Funds	2018
	Total window wall replacement	\$ 850,000	Cnty Approved	2019
	Parking lot resurfacing	\$ 300,000	Cnty Approved	2019
ARDMORE ELEMENTARY	Steam kettle and electric breaker panel replacement	\$ 33,000	County Approved	2015
	Fire alarm replacement	\$ 125,000	State and Cnty Approved	2016
	Upgrade grease trap-code violation	\$ 36,735	Cnty Approved	2016
	Repavement of parking lot	\$ 250,000	State and Cnty Approved	2016
	Underground storage tank removal/install above ground storage tank	\$ 250,000	Cnty Approved	2019
	Bathroom partitions	\$ 50,000	Cnty Requested	2020
ARROWHEAD ELEMENTARY	Condensate piping	\$ 539,452	State and Cnty Approved	2013

	Steam kettle and electric breaker panel replacement	\$ 33,000	Cnty Approved	2015
	Drainage repair	\$ -	State & Cnty Approved	2015
	Mechanical Equipment Upgrade including Univent, and AHU Replacement and Pneumatic controls to DDC Conversion	\$ 1,916,250	State & Cnty Approved	2018
	Asbestos abatement	\$ 19,000	General Operating Funds	2018
	Window/Storefront/Doors replacement	\$ 650,000	Cnty Approved	2019
	Switchgear replacement	\$ 150,000	Cnty Approved	2019
AVALON ELEMENTARY	N/A			
BADEN ELEMENTARY	Steam kettle and electric breaker panel replacement	\$ 33,000	Cnty Approved	2015
	Univent and fan coil replacement	\$ 1,917,000	State & Cnty Approved	2017
	Exterior door replacement	\$ 255,000	State & Cnty Approved	2017
BARACK OBAMA ELEMENTARY	N/A			
BARNABY MANOR ELEMENTARY	Roof replacement-partial 1991 mod only	\$ 371,000	State & Cnty Approved	2014
	Steam kettle and electric breaker panel replacement	\$ 33,000	Cnty Approved	2015
	Upgrade grease trap-code violation	\$ 45,000	Cnty Approved	2015
