Re: PGCPS Radon Testing Services

Location: Bonnie Johns Educational Center 8437 Landover Road Landover, MD 20785

Dear Mr. Baylor,

Soil and Land Use Technologies (SaLUT) is pleased to submit the following report to Prince George's County Public Schools (PGCPS) pursuant to completing "short-term" 3-day radon testing for Bonnie Johns Educational Center, located at 8437 Landover Road Landover, MD 20785.

SaLUT conducted short term radon testing to evaluate indoor radon levels relative to the USEPA's recommended action level of 4.0 picocuries per Liter (pCi/L) - the level at which the EPA recommends that schools take action to reduce the level. SaLUT conducted the radon testing following the requirements set forth by PGCPS as well as standards set by the American Association of Radon Scientists and Technologists (AARST).

SaLUT visited the site on 11/03/23 and placed seven (7) activated charcoal radon test kits throughout four (4) rooms. Kits were placed in ground contact rooms that are considered to be frequently occupied and were not previously tested in past years. SaLUT then returned to the school on 11/06/23 to collect the kits. Once all the kits were collected, they were shipped to the Airchek laboratory located in Mills River, North Carolina for analysis.

Within this report you will find a school summary page of the results, the official laboratory analysis report, and a school map with testing locations clearly marked.

If you have any questions or comments regarding this report, please feel free to contact me at (410) 474-2044.

Sincerely,

Thomas Howell

Project Manager

Thom ALD

Prince George's County Public Schools Radon Testing

School Results Summary

Site Name	Bonnie Johns Educational Center		
Date range testing occurred	11/03/23 – 11/06/23		
Date Report Delivered	11/13/23		
Number of Kits Deployed	7		
Number of Rooms Tested	4		
Number of rooms ≥ 4.0 pCi/L	0		
Lowest Value	<0.3 pCi/L		
Highest Value	1.9 pCi/L
